March 2016

1 Done so Far

I have downloaded the 2000s data from the Retrosheet SQL database download and put it into a MySQL database stored at MySQL@localhost:8889. When I need to get the 2010's data, I should figure out how to import it correctly, or should create a new database and import using MySQL workbench.

2 Next Steps

I should start running queries using Python or R to to start building a model that can be used for predictions. All this related stuff is stored in $/Users/nathanieldavenport/Desktop/Stu$
